

WELCOME

TO MY PRESENTATION

DISASTER MANAGEMENT APP

Empowering individuals, businesses & governments with rapid disaster relief & insurance claims processing.

CHALLENGES

1. Slow Insurance Claim Processing;

Traditional insurance processes are bureaucratic and time-consuming.

2. Lack of Affordable & Accessible Coverage;

Many individuals and businesses do not have disaster insurance.

3. Inefficient Emergency Response Coordination;

During disasters, victims face issues.

4. Fraud & Mismanagement in Insurance Claims;

Disaster insurance fraud is common, with false claims draining resources and delaying payments for real victims.

SOLUTION

1. Create a systematic AI-driven claim process ; Automated documenting and disaster analysis.
2. Accessible & Affordable Coverage; Custom Insurance Plans – Users can choose affordable, flexible policies.
3. Real-Time Emergency Assistance; Disaster Alerts & Updates – forecasts disasters and notifies users.
4. Risk forecasting and awareness user on the threats that may be around their environment; like maps with high risk zone.

Product

A modern, easy-to-use insurance app designed for today's mobile-first users.

Fast quotes, clear policies, instant claims—all from your phone.

1. AI & satellite data to analyze disasters and how to manage them.

2. Claims are automated for fast pay.

3. Fast emergency support and connection.

4. Efficiency in risk prediction and insurance optimization.

Competitors

1. mTek-Services: A fully digital insurance platform offering paperless transactions for various insurance products, including motor, health, and travel insurance. You can check it out [here](#).
2. INAT (Insurance Agency Technology): An API-based InsurTech company that provides digital insurance solutions, including policy purchase, renewal, and management. Learn more [here](#).
3. M-TIBA: A health insurance platform that enables users to access benefits from insurers, manage claims, and streamline healthcare payments digitally. More details [here](#).

Competitive Advantage

- Your insurance app stands out because of its strategic integration of AI and blockchain, which enhances security, transparency, and efficiency in claims.
- your user-friendly front-end design ensures seamless navigation, with responsive layouts that adapt to different devices. Your attention to text alignment and layout structure makes the interface polished and intuitive.
- AI-Powered Risk Assessment: Unlike traditional insurance platforms, your app integrates AI to provide real-time disaster risk analysis, helping users make informed decisions about coverage.
- Automated Emergency Response: A unique feature that connects users to emergency services and disaster relief resources instantly.

Project Traction

Business Model

How are you making money?

We operate on a **freemium model** with optional **premium subscriptions** and enterprise solutions for larger clients.

Additional revenue is generated through in-app purchases and partner integrations.

What are your profit margins?

Our gross margin is currently around 65%, with projections to **increase to 75%** as we scale and optimize infrastructure.

We're targeting a net profit margin of 25% by Year 2 after initial acquisition costs stabilize.

Go To Market

How you will reach your customers

- Content Marketing: Blog posts, SEO, YouTube explainers.
- Social Media Ads: Targeted Meta and LinkedIn ads.
- Influencer Partnerships: Collaborations with niche creators.
- Referral Program: Incentivize early adopters to share.
- Email Campaigns: Automated onboarding and nurture flows.
- Public launch with a PR push and Product Hunt feature.

Social Impact

What SDGs is your solution addressing?

- Highlighting the social impact metrics that align with the (SDGs), increasing access to **insurance**, **promoting economic growth and supporting health and well-being**.
- Including a section that ties my app's features and progress directly to relevant SDGA, such as Goal 3 (**Good Health and Well-being**) or Goal 8 (**Decent Work and Economic Growth**).
- Targets underserved populations with subsidized or innovative microinsurance models.
- Help break circles of poverty by ensuring assets and **livelihoods** are protected.

Our Ask

- We seek \$50,000 in funding to enhance app development, expand outreach, and drive social impact.
- Allocate towards:
 1. **Technology Development:** Building features aligned with SDGs, such as accessible insurance tools for underserved populations.
 2. **Community Partnerships:** Collaborating with NGOs to provide subsidized policies.
 3. **Marketing and Outreach:** Targeting rural and low-income communities to increase adoption.
